Experienced full-stack, front-end-focused, software engineer with a focus on intuitive, scalable design solutions for digital tools. Skilled in JavaScript, React, and TypeScript, with a strong background in collaborating with stakeholders to enhance end-to-end user experiences.

EXPERIENCE

The Gartrell Group, Portland, OR — Senior Developer *(Full-time)*

July 2021 - Present

- Created “lighthouse” equity map application for City of Hillsboro,, commissioned by Esri
- Architected and built the entire interactive mapping module for the Texas DOT TAMES/TCAP platform, delivering a highly feature-rich GIS application used to support statewide infrastructure planning and data-driven decision-making. Designed and implemented advanced spatial tools, performance-optimized rendering, and scalable data integration using React and ArcGIS Online.
- Led strategic front-end development initiatives as primary technical liaison on a high-visibility Portland General Electric engagement (IQGeo platform). Directed technical design, system architecture decisions, and complex GIS integrations using JavaScript, React, PostGIS, PostgreSQL, Python, and SQL.
- Developed and delivered customized GIS-based enterprise solutions within the IQGeo platform for clients including Northwest Natural, Canadian National Railway, and Montana-Dakota Utilities. Transformed operational workflows through user-centered interface design and spatial data engineering.

SimBCo, Portland, OR — *Developer (contract)*

December 2018 - July 2021

- Architected a full-stack enterprise credit processing application for a regional credit union, optimizing it to handle over $2 million in monthly transactions with scalability and reliability in mind.
- Developed an Interactive Slide viewer for OHSU. Javascript, Angular, PostGres, Node/Express, Feathers
- Conducted unit, integration, and regression testing using Mocha and Assert, improving code reliability and user satisfaction.

Florida State Psychology Department, Tallahassee, FL — *Directed Individual Study*

2012-2014

- Conducted research under renowned psychologist Anders Ericsson, contributing to studies on expertise development, including the 10,000-Hour Rule.
